

AIAA Greater Huntsville Section Goes to the Stars and Finds Water

The Greater Huntsville Section of the American Institute of Aeronautics and Astronautics (AIAA) attended a Minor League Baseball game between the Huntsville Stars and the Jackson Generals on July 8 at Joe Davis Stadium in Huntsville, Alabama. Seventeen

hardy section members, family and friends braved a stormy weather forecast for an evening of baseball and camaraderie. The night began with each attendee writing down a prediction of the final score. The slips of paper were then put in a bag to be drawn for a free drink after each Stars homerun.

Unfortunately, the poor weather forecast proved accurate. The skies opened up during the 6th inning and fans took shelter from the rain. The game was soon called with the home team behind but not before many hotdogs and beverages were downed, several exciting plays were made, a foul ball was caught one-handed by a section attendee and a Stars homerun produced a free drink for one lucky individual. The person with the closest guess to the final score was awarded free attendance at the next section luncheon.

The Greater Huntsville Section enjoyed its trip to the Stars despite the unwanted discovery of H₂O.

The American Institute of Aeronautics and Astronautics (AIAA) is the principal society and voice serving the aerospace profession. Its purpose is to advance the arts, sciences, and technology of aeronautics and astronautics and to foster and promote the professionalism of those engaged in these pursuits. The Greater Huntsville Section of the AIAA works to provide a professional forum for the local aerospace community. For more information, visit www.hsv-aiaa.org or e-mail distribution@hsv-aiaa.org.
