

AIAA GHS Pumpkin-Carving Contest

The AIAA Greater Huntsville Section held an aerospace-themed pumpkin carving contest in the month of October. We received seven submissions. Winners were determined based on Facebook voting. 1st place went to Matthew Hitt with a pumpkin featuring the James Webb Space Telescope. 2nd place was Tom Hinkemeyer with the lunar lander rocket “Luna” from the 1950 sci-fi movie “Destination Moon.” 3rd place went to Jim Moore, Isabel Nield, and Steven Thornton for their pumpkin representing NASA’s Solar Cruiser mission. Other pumpkins featured Space Launch System, the ISS Cupola, and the Human Landing System.

Winning pumpkins (top left: James Webb Space telescope, top right: Luna from Destination Moon, bottom left: Solar Cruiser).
